 A. Per-Crop Summary

Corn \$454.50 MARGIN / ACRE Favorable Break-even: \$2.04 /bu Total margin: \$113625.00	Soybeans \$355.40 MARGIN / ACRE Favorable Break-even: \$4.37 /bu Total margin: \$99512.00	Wheat \$194.80 MARGIN / ACRE Favorable Break-even: \$5.21 /bu Total margin: \$19480.00
--	---	--

 B. Comparative Table

	Corn	Soybeans	Wheat
Acres planted	250	280	100
Cost / acre	\$378.00	\$227.00	\$203.00
Income / acre	\$832.50	\$582.40	\$397.80
Margin / acre	\$454.50	\$355.40	\$194.80
Total margin	\$113625.00	\$99512.00	\$19480.00
Cost / bushel	\$2.04	\$4.37	\$5.21
Break-even price	\$2.04	\$4.37	\$5.21
Current price	\$4.50	\$11.20	\$10.20
Price vs B/E	Favorable	Favorable	Favorable

C. Fertilizer +10% Scenario

Crop	Current Margin/acre	With +10% Fertilizer	Δ Impact
Corn	\$454.50	\$439.50	-\$15.00
Soybeans	\$355.40	\$349.40	-\$6.00
Wheat	\$194.80	\$190.80	-\$4.00

D. Farm Totals

630 TOTAL ACRES	\$410977.00 TOTAL REVENUE	\$178360.00 TOTAL COSTS
\$232617.00 TOTAL NET MARGIN	\$369.23 AVG MARGIN / ACRE	

E. Recommended Decisions

- Corn: A +10% fertilizer increase costs \$15.00/acre. Verify yield response justifies the spend.
- Soybeans: A +10% fertilizer increase costs \$6.00/acre. Verify yield response justifies the spend.
- Wheat: A +10% fertilizer increase costs \$4.00/acre. Verify yield response justifies the spend.
- Best margin/acre this season: Corn at \$454.50. Consider expanding if agronomically feasible.

F. Long-term Financial Levers

- **Manure / organic amendments:** may reduce synthetic fertilizer cost over time.
- **Cover crops:** can improve soil health and reduce input needs in future seasons.
- **Non-GMO seed:** in some regions lowers seed cost/acre while maintaining acceptable yield.
- **Crop diversification:** spreading risk across multiple crop types reduces price exposure.
